

**Kim Dong Wook**

Full-Stack AI Engineer

Seoul, Republic of Korea  
dongwook443@yonsei.ac.kr  
github.com/Dindb-dong

## EDUCATION

**Yonsei University, Seoul, Korea**

| Mar 2023 - Present

*Candidate for Bachelor of Science in Applied Statistics and Computer Science*

## WORK EXPERIENCE

**Leviosa AI, Seoul, Korea**

| Mar 2026 - Present

*Full Stack AI Engineer & Founding Member*

- Built Cafe24 commerce automation workflows across CS automation, sourcing, upload, chat, and AI detail page generation.
- Developed production AI workflow infrastructure with TypeScript, React, Node.js, Python/FastAPI, Supabase/RDS, Redis, S3, Docker, and AWS.
- Implemented Chat MCP workspace and controlled AI tool-call flows for sourcing, products, orders, CS, and content operations.

**Alus Healthcare Co., Ltd., Seoul, Korea**

| Jun 2025 - Sep 2025

*Researcher*

- Conducted data analysis for new business development and executive decision support while supporting OEM meetings, product launch preparation, brand promotion, and C-level operational tasks.
- Developed and operated a Cafe24-based shopping mall after an external vendor became inactive.
- Built a logistics management automation system with React, Node.js, Supabase, and Cafe24 API integration.

## EXTRACURRICULAR ACTIVITIES

**Yonsei University AI Club YAI, Seoul, Korea**

| Mar 2025 - Present

*Research Member & Vice President*

- Fine-tuned EfficientFace and AdaIN models for emotion classification and style transfer workflows.
- Built a CLIP + BLIP2 text-to-image retrieval pipeline to locate video scenes from natural language queries.
- Developed a Dueling DDQN Pokemon battle agent trained on a self-developed battle simulator.
- Built web-shadow-boxing, a webcam-based AI sparring partner using pose estimation and GRU trajectory prediction.

**UN Youth Sustainable Development Society SDP, Seoul, Korea**

| Mar 2024 - Feb 2025

*14th Tech Team Leader*

- Led React Native development for UPCY, a secondhand clothing trading platform for reformers and upcyclers.
- Coordinated implementation with design, marketing, and research teams through TestFlight-stage validation.

**NotchNote**

| 2026

*Founder*

- Built a context-aware macOS memo app with quick overlay capture, pinned notes, library/calendar workspaces, GitHub Releases distribution, and a live landing page at notchnote.com.

## SKILLS

|                   |                                                                                                     |
|-------------------|-----------------------------------------------------------------------------------------------------|
| <b>Languages</b>  | JavaScript, TypeScript, Python, R, C++, C#, Java, Dart                                              |
| <b>Frameworks</b> | React, React Native, Flutter, Node.js, Supabase, AWS, Docker, Kubernetes                            |
| <b>AI / Data</b>  | PyTorch, TensorFlow, Qiskit, Pennylane, computer vision, reinforcement learning, data visualization |
